

# SR301RT

NSN# 6530-01-497-5624

The low profile and ground-hugging center of gravity of the SR301RT provides a unique platform to complete tasks which, up until now, required two to four personnel. In critical disaster situations where manpower is limited, one man can gather casualties and deliver them to aid stations. This holds true even when personnel are required to perform these tasks in Level A Suits. Because of the unique design of the SR301RT it can function as a bulk hauler deploying equipment which usually requires several personnel. Available accessories include Dual Wheels (CH471 NSN# 3920-01-511-3701) and a Handle Medical Bag (SR431 NSN#3920-01-529-5123), which provide additional cargo space for medical supplies; Back Rest (SR700BR) (NSN# TO BE ASSIGNED) and either a Raven or Talon Stretcher. Unit weighs 25 lbs. with a weight capacity of 500 lbs.

Shown with optional  
Raven Stretcher

## DIMENSIONS
